Subject:	Enable Redmine REST API		
Description:	<p>Hi,</p> <p>I'm trying to use the following app to access this Redmine installation, but am unfortunately unable to get it to work, I believe this is because the app requires to Redmine REST API to function, would it be possible to enable this?</p> <p>https://itunes.apple.com/gb/app/redminepm-redmine-client-app/id631915897?mt=8</p>

Thanks for pointing it out. I will have a quick look into it. This looks pretty low priority though so if I can't work it out then it may end up staying disabled I'm afraid.
