Subject:	Allow multiple DNS master IPs, both v4 abd v6		
Description:	At the moment it is only possible to have a single IPv4 master IP. It should be possible to use IPv6.		

History

2016-05-20 19:08 - admin

- Subject changed from IPv6 master IPs to Allow multiple DNS master IPs, both v4 abd v6

It is now possible to have IPv6 addresses as DNS masters.

As I am rewriting the monitoring configuration at the moment I'd like to expand the scope of this to allow for multiple master IPs.
