Subject:	Show the CPU architecture (i686 or amd64) in the panel		
Description:	<p>You currently can't see the CPU architecture anywhere in the panel. As it seems like i686 will be with us for some time, it will be useful to see.</p> <p>Perhaps it can be added on the end of the "Operating System" text, e.g. "Ubuntu 16.04.x LTS (Xenial Xerus) / amd64" instead of just "Ubuntu 16.04.x LTS (Xenial Xerus)"</p>
