Subject:	Show the CPU architecture (i686 or amd64) in the panel
Description:	You currently can't see the CPU architecture anywhere in the panel. As it seems like i686 will be with us for some time, it will be useful to see.
	Perhaps it can be added on the end of the "Operating System" text, e.g. "Ubuntu 16.04.x LTS (Xenial Xerus) / amd64" instead of just "Ubuntu 16.04.x LTS (Xenial Xerus)"
