Subject:	Add host name to data transfer reports		
Description:	<p>A customer has requested that rather than just the VPS account name being used in the data transfer emails, the host name (reverse DNS of the primary IPv4 address) should be shown too, as they found it confusing which VPS was the subject of the report.</p> <p>So instead of:</p> <pre>&lt;pre&gt; From: BitFolk Data Transfer Monitor &lt;xfer@bitfolk.com&gt; Subject: [4/4] BitFolk VPS 'tom' data transfer report  This is a weekly report of data transfer for domain 'tom' on host 'tanqueray.bitfolk.com'. This report is informational only and not an invoice or bill. &lt;/pre&gt;  It would look more like:  &lt;pre&gt; From: BitFolk Data Transfer Monitor &lt;xfer@bitfolk.com&gt; Subject: [4/4] BitFolk VPS 'tom' (tom.dogsitter.services) data transfer report  This is a weekly report of data transfer for domain 'tom' (tom.dogsitter.services) on host 'tanqueray.bitfolk.com'. This report is informational only and not an invoice or bill. &lt;/pre&gt;</pre>
