Subject:	Report backup schedule in human-readable form		
Description:	Backup schedules are currently reported as a set of four numbers, e.g. 6-7-4-6. This describes how many of each layer of backups will be kept. The layers are: * 4-hourly * daily * weekly * monthly so "6-7-4-6" represents a more friendly description of: "Every four hours retaining six iterations; every day retaining seven iterations; every week retaining four iterations and every month retaining six iterations" It would be nice to generate and display this human-readable description in the panel wherever the current schedule string is present.
