Subject:	PowerDNS doesn't support \032 in record labels		
Description:	PowerDNS currently does not support \032 in record labels (left hand side), which breaks zones which want to use DNS service discovery (Bonjour). The bug has been reported the the developers: http://wiki.powerdns.com/trac/ticket/345 Until we get a fix, customers who have zones with these kind of records will need to avoid using b.authns.bitfolk.com and c.authns.bitfolk.com. a.authns.bitfolk.com is BIND and doesn't have this bug, so is still usable.		

History
